On Flaring and Venting Reduction
and Natural Gas Utilisation

Session on Emerging Gas Utilization Technologies: Possibilities & Barriers

Session Moderator

Dr. Mostefa Ouki

**Vice President, Energy Resources
Nexant**

Introduction

- **Significant volumes of gas continue to be flared**
- **A lot of effort deployed, but persistent barriers**
- **Multifaceted challenges continue to hamper viable recovery of flared gas, especially small gas volumes**
- **Emergence of technologies for small-scale gas utilization**

→ Focus of our Panel

Panel

Our Panelists

- **Upstream Operator**
- **Technology Developers**
- **But, keen to hear also from:**
 - End users
 - Government agencies
 - Regulators
 - Other stakeholders

Aim

Our Aim is to:

- Go beyond just a review of technologies in isolation
- Initiate or build on an integrated approach to understanding and analysis of the barriers and possible options to remove them or mitigate their impact

This would require involvement of all stakeholders!
