

Municipal Solid Waste Update

México

Sergio Gasca Alvarez and Cesar R. Chavez Ortíz
SEMARNAT - Mexico
GMI Municipal Solid Waste Subcommittee Meeting
Vancouver, Canada, 13 March 2013

Partner Country Update

- Implementation of a National Program of Prevention and Comprehensive Waste Management (2008-2012) [NPPCSWM]
- Publication of a Mexican Official Norm (NOM) for Management Plan of Special Solid Waste (include OM-MSW)
- New version of a National Program of Prevention and Comprehensive Waste Management (2013-2018)

Partner Country Update

- 7 Landfills with gas energy facilities (sn - Bordo Poniente)
- CDM- Programatic Framework in Landfills
- Feasibility study (Bio-Cancun), additional project in Colima, Aguascalientes, Jalisco.
- 16 new composting plants, financing through NPPCSWM

Methane Action Plan

- **Summary.-** Implementation of a new National Program with special focus on infrastructure for correct SWM and maximal valorization of SW, with additional tools box.
- **Activities to promote mitigation/abatement.-** Implementation of a MP-ELV and develop of projects for OM-Biodigestor Plants.
- **Drivers to advance project development.-** Capacity Building (Technical and Business) and Transfer of Technology
- **Challenges to mitigation/abatement.** Implementation in all states with voluntary legal instruments

Methane Action Plan

- **Public and private sector involvement.**- 32 state authorities, private companies regarding biogas and biomass projects, and CMD consultants and developers
- **Barriers.**- The private companies are prepared to develop small projects in Biomass and Biogas.
- **Assistance needed** to impulse the Mexican companies and develop and implement of the economic, financial or tax instruments, and provoke the active action for decision and politic makers
- **Information needed.**- Develop new markets associated with recycling materials, which come from waste

Nationally Appropriate Mitigation Action (NAMA)

- **NAMA involvement (currently developing or interested in NAMA).** Mexico will elaborate the NAMA document. Our main concerns are:
 - a).- complement the basic infrastructure for SWM
 - b).- achieve the maxima valorization of SW
- **Waste sector NAMA?.-** Solid Waste and Special Solid Waste Management
- **Cooperating agencies: NGOs, development agencies, or assisting countries.-** SEMARNAT is working alone at this moment
