

Summary of Subcommittee Survey Results

- Generally agree focus should include both LFG and methane abatement as an alternative to landfilling
 - Still need to determine how much effort for LFG vs. methane abatement
- Majority agree on activities for both focus areas
 - YES – Forum for exchange of technical info
 - YES – Produce and share tools and resources
 - NO – Direct activities (conduct assessments, training)

Summary of Subcommittee Survey Results (Continued)

- Generally agree on options to support methane abatement activities
 - YES – Anaerobic digestion and composting
 - MAYBE – Waste-to-energy
- NAMAs
 - Majority agree subcommittee should facilitate information exchange and support Partner Country efforts
 - For country efforts, support development of:
 - Quantitative tools and/or analysis for methane contribution
 - MRV framework

Summary of Subcommittee Survey Results (Continued)

- Best practices guides
 - All respondents have used new IBPG for LFG energy projects
 - Additional guides should cover:
 - Composting
 - Anaerobic digestion
 - Waste-to-energy
- GMI website (globalmethane.org)
 - All respondents use weekly or monthly and agree it serves their needs
